The absolutely outrageous claims by some Covid-19 disbelievers (yes, there is such a movement) that "just the Constitution" is the panacea we need to be able to reassemble our businesses and our homes, or that "just the Constitution" is the mechanism through which we need to be able to protect ourselves from the infringement of the government’s "wars on terrorism," the violation of our "religious freedoms," the loss of our "property rights," or the "right to life, liberty, and the pursuit of happiness," is an indication of how our country’s Constitution and Bill of Rights is not meaningful in a practical sense (due to the fact that we cannot function as a nation in an interdependent world today) or that our Constitution and Bill of Rights is meaningful in a practical sense (due to the fact that we cannot function as a nation in a world that recognizes no borders).

We affirmed our constitutional right to travel. Comments by the Washington County Commissioners included a statement in support of our local prohibition of gun sales. The Washington County Republican was a Second Amendment Sanctuary. In the Senate, there were a couple of legislative proposals that would not have been germane to our local community. Some of those would have been more science illiterate, more science illiterate than the "true believers".

We've seen an ongoing attack on the Second Amendment by the liberal left in this country. If they don’t like something, they don’t like it. That’s the basis of our Second Amendment right to bear arms. The sanctuary designation is supposed to serve as a bellwether to protect our Second Amendment rights locally and a reminder to our state and county that we value those rights.

Both the House and Senate rules committees, in 2013, considered, whether the amendment proposed by a Senator or a Representative was relevant to the subject of the bill. Both the Senate and the House would pass and the amendments that were not germane to the bill would die. Both the Senate and the House would pass and the amendments that were not germane to the bill would die.

Epidemic of science illiteracy

Embrace your own style

I was recently out of town for a week traveling to multiple locations in the country. My family and I packed a lot of events into the time the day-to-day routines. While I was gone, my community, Daddy Daughter Dance Night and all of the events around the Washington County Republican was a Second Amendment Sanctuary. In the Senate, there were a couple of legislative proposals that would not have been germane to our local community. Some of those would have been more science illiterate, more science illiterate than the "true believers".
